

Quality assurance

Quality awareness is such a basic value which is expected from all of our employees during work in order to guarantee the desired product quality to our Clients. The most important of our resources is professional experience and knowledge of our employees; therefore we focus on continuous advanced training.

Our quality management system is based on PED as European guideline, but we dispose also of other certifications. We have made our technology, testers and quality controllers instructed upon our PED quality management system to perform their tasks.

We have implemented following standards:

- [ISO 9001:2009 Quality Management System certification](#) ^[1]
- [DIN-18800-7:2008-11 Klasse D](#) ^[2]
- [Applicable for qualified NATO supply](#) ^[3]
- [Certificate and regulatory attestation upon decree No. 3/1998, \(I.12.\) of the Ministry of Industry and Trade](#) ^[4]
