

About the company

Gonczi & Son Ltd. has been established in 1974 as a small private undertaking and has become one of the largest companies producing products of the steel industry in Hungary and in Middle Eastern Europe in the last three decades. The company produces products of the steel industry in a large quantity until 1991. Our articles can be found in almost all countries of Europe, and even in the region of Middle East and Eastern Asia. Our manufacturing division has moved to Kunhegyes at the end of 1992.

Our main activities are:

- manufacturing recumbent cylindrical storage tanks
- manufacturing of pressure vessels and technical equipments
- construction of steel structures

Our professional experience is based on the work of decades and guarantees thoroughgoing work of excellent quality to our Clients. In order to assure the high quality of Western Europe for container production our company is supervised and audited from the first quarter of 1993 by TÜV Rheinland.
